# SEBASTIAN BŁAŻEJEWSKI

## FRONTEND DEVELOPER

As a Frontend Developer, I've spent the last year and a half diving into Angular, and a year getting to know Vue.js. I'm having a good time turning designs into reality, making web applications that are responsive, dynamic, and go beyond what users expect. I'm looking for an environment that thrives on creativity and challenges, where I can contribute my skills and continue to grow both professionally and technically with your team.

## EDUCATION

**Wroclaw University of Science and Technology**

Bachelor of Mechanical and Energy Department - Aircraft Engineering

Oct 2012 - Feb 2017

## TECHNICAL SKILLS

**Languages:** JavaScript (ES6+), HTML5, CSS3, TypeScript

**Frameworks/Libraries:** Vue.js, Angular, Vuex, NgRx, Bootstrap, Tailwind CSS

**Tools & Technologies:** Git, Webpack, npm, Visual Studio Code, WebStorm, Jest

**Other Skills:** Responsive Design, Agile methodologies, Bitbucket, GitHub, GitLab, Jira, Confluence, Citrix, WordPress, Adobe Photoshop

## LANGUAGES

Polish - native, English - B2/C1

## WORK EXPERIENCE

### Atos/Eviden

*Frontend Developer - 1/2023 - Present*

I am currently working on a car infotainment system app, using **Angular 14+** with **TypeScript**. This involved using a **Target Simulator** and **RSI Data Tool** - SDK, which is essential for this app development.
I use **NgRx** to manage the app's data, and **JEST** to write tests.

*Frontend Developer - 2/2022 - 12/2022*

I worked on a project for the ATOS HR team to help manage the data for new employees. My job was to build features using **Vue 2** with **TypeScript** and **Vuex** for state management. I wrote tests in **JEST** and for the UI designs I used **Bootstrap** library.

*Trainee - 2/2021 - 2/2022*

Bootcamp - Developed a fully functional online store using **Vue.js** featuring product listings, a shopping cart, pagination, and user authentication. I participated in courses with Tomasz Ducin to learn more about **Javascript** and **Angular** as a second framework. Also while I was working I built few small projects available on my **GitHub** page.

## HOBBIES

Web designs, Crypto, Graffiti, E-sports
